## Cash Management System

CTS presents a new, complete, family of recycling products both for banknotes and coins that offer outstanding quality, functionalities, operability and reliability, suitable for any Point Of Sales application both attended or unattended.

Dedicated features meet the needs of businesses in a wide range of markets, including: supermarket, small shops, transport companies, post offices, banks and for all those who wish to simplify, optimize and secure coins and banknotes based cash payments in their daily operations.

The units can perform counting, validation and sorting of incoming coins and banknotes, of all the denominations, and can then recycle them to dispense change.

It is possible to combine the two recycler devices in order to create a solution that can easily handle any kind of cash payments.
